RAJESH SHREEPAD NAIK

To get an opportunity where I can make the best of my potential and contribute to the organization's growth.

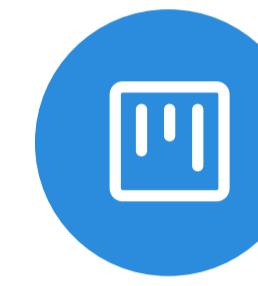

WORK EXPERIENCE

Web Development Intern

Aqmenz Automation Pvt Ltd

August 2023 - October 2023

Built and deployed a Food restaurant with React,Bootstrap,Node Js and MongoDB.

PROJECTS

Online Farmer Market :

Technologies Used : MongoDB, Express, ReactJS, NodeJS

- The farmer's production system can be planned, followed, and analyzed using this web based system. One system is used to oversee all aspects of farm operations, and data is centralized.
- Both farmers and consumers are motivated to produce and buy fresh meals as a result.
- Food quality will be ensured and farmer-buyer relationships will be strengthened through this system.

E-Healthcare-Management-System :

Technologies Used : HTML, CSS, JAVA, MySQL

- It deals with the collection of patient information, diagnosis details, etc.
- The main function of the system is to register and store patient and doctor details, retrieve these details as and when required, and also manipulate these details meaningfully System input contains patient details and diagnosis details, while system output is to get these details on the screen.

Text Editor :

Technologies Used : JAVA

- A text editor is a tool that allows a user to create and revise documents in a computer. Though this task can be carried out in other modes, the word text editor commonly refers to the tool that does this interactively.
